

YOHAN DAMIAN SMITH

387/1B Isuru Uyana, Mahara, Kadawatha | 0720297647 | www.linkedin.com/in/yohandamiansmith | yohandamiansmith@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented Data Science Graduate with hands-on experience in data labeling, analytics, and machine learning. Skilled in Python, SQL, and modern AI workflows, with practical exposure to computer vision dataset annotation, statistical analysis, and predictive modeling. Passionate about transforming data into actionable insights and contributing to real-world AI/ML projects.

EDUCATION

London Metropolitan University – UK BSc (Hons) in Data Science (Top-Up) – Esoft Metro Campus, Colombo <i>Graduated with Second Class Upper Honors</i>	2025 – 2026
Esoft Metro College – Kiribathgoda, Sri Lanka Pearson BTEC Level 5 Higher National Diploma in General Computing <i>Passed with Merit</i>	2022 – 2024
St. Joseph's College – Colombo 10, Sri Lanka G.C.E. Advanced Level Examination 2024(25) (Physical Science Stream) – 3S	2022 – 2024
G.C.E. Ordinary Level Examination 2021(22) – 5A, 3B, 1C	2021 – 2022
Esoft Metro College – Kiribathgoda, Sri Lanka Diploma in Information and Communication Technology (DiTEC) <i>Passed with Merit</i>	2021 – 2022

WORK EXPERIENCE

Data Labeler – Atlas Labs | Aug 2026 – Present

- Annotating and labeling large-scale image and video datasets using Label Studio and CVAT to train and validate computer vision models.
- Ensuring accuracy, consistency, and quality across annotation tasks, directly supporting model training reliability.
- Collaborating with data science and cross-functional teams to align annotation work with ML data requirements.

Executive, Foreign Operations – Infomate (Pvt) Ltd (John Keells Group) | May 2025 – May 2026

- Worked as a process associate for a Sweden-based BPO project called “Pagero”.
- Handled invoice/document processing with high accuracy and quality control.
- Developed skills in data handling, error detection, time management, and teamwork in fast-paced environments.

SKILLS

Technical Skills

- Programming - Python, SQL, R, C#, Java
- Libraries & Frameworks - NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch
- Visualization tools - Power BI, Tableau
- Database management tools - MySQL, MongoDB
- AI/ML exposure - Generative AI, LLMs, embeddings, RAG pipelines, LangChain, agentic AI workflows
- Mostly used tools & platforms - Jupyter Notebook, Git/GitHub, Hugging Face, CVAT, Label Studio
- Cloud & DevOps basics - AWS, Azure, GCP, Docker, Kubernetes

Soft Skills

- Strong analytical thinking and problem-solving abilities.
- Effective communication of technical and non-technical insights.
- Team collaboration and adaptability in fast-paced environments.

PROJECTS

Customer Satisfaction Analysis Dashboard (Top Up Degree) – [Github](#)

- Analyzed datasets by applying data cleaning and preparing to uncover customer trends; used Git for data extraction of the datasets building an interactive dashboard in Tableau.

MediCareApp – Scalable Web App for Integrated Healthcare Management (TopUp Degree) – [Github](#)

- Built a healthcare management system to manage patients, appointments, and administrative workflows with secure role-based authentication using SQL Server and Identity Framework, following MVC architecture with a responsive frontend.

Scalable Healthcare Recommendation System – Final Project (TopUp Degree) – [Github](#)

- Developed a privacy-focused diabetes risk prediction system using federated learning for decentralized training. Applied PyTorch, SMOTE, and SHAP for modeling, imbalance handling, and explainability, with a Streamlit-based interface for predictions.
