

YOHAN DAMIAN SMITH

387/1B Isuru Uyana, Mahara, Kadawatha | 0720297647 | www.linkedin.com/in/yohandamiansmith | yohandamiansmith@gmail.com

PROFESSIONAL SUMMARY

Enthusiastic, detail-oriented Data Science undergraduate seeking an internship or entry-level opportunity in the fields of Data Science, Data Analytics or AI. Skilled in practices such as data cleaning, EDA, statistical analysis, visualization and machine learning concepts using Python, SQL. Passionate about transforming data into actionable insights while contributing to real-world analytical and business-driven projects.

EDUCATION

London Metropolitan University – UK **2025 – Present**

Top Up – BSc (Hons) in Data Science at Esoft Metro Campus, Colombo

Esoft Metro College – Kiribathgoda, Sri Lanka **2022 – 2024**

Pearson BTEC Level 5 Higher National Diploma in General Computing

St. Josephs College – Colombo 10, Sri Lanka **2022 – 2024**

G.C.E. Advanced Level (A/L) Examination **2024** – Physical Science

- Sat for the examination as an English medium student (Local Syllabus) and passed the exam.
- Subjects – *Combined Maths, Physics and Chemistry*

G.C.E. Ordinary Level (A/L) Examination **2021-2022**

Roman Catholicism – A
History – A
English – A

ICT – A
Mathematics – A
Science – B

Sinhala – B
Business & Acc. Studies – B
Art – C

Esoft Metro College – Kiribathgoda, Sri Lanka **2021 – 2022**

Diploma in Information and Communication Technology (DiTEC)

WORK EXPERIENCE

2025 May – Present

- Executive - (Non-Financial Services) **Infomate (Pvt) Ltd** (John Keels Group Company)
 - Working as a Process Associate for a Sweden-based BPO project called Pagero.
 - Handling invoice and document processing while maintaining high levels of data accuracy and quality control.
 - Experience gained in data handling, attention to detail, error handling, time management, and teamwork within a fast-paced operational environment.

SKILLS AND ABILITIES

Technical Skills

- Programming Languages: Python, SQL, C#
- Data cleaning, preprocessing, EDA, ETL, statistical analysis, ML concepts
- Familiarity with python frameworks and libraries like numpy, pandas, sci-kit learn, pytorch, etc.
- Data Visualization: Power BI, Tableau, Matplotlib, Seaborn
- Tools & Technologies: Jupyter Notebook, IBM SPSS, Git / GitHub (version control)
- Database Management: MySQL
- Web Development: HTML, CSS, JavaScript, PHP (basic full-stack understanding)
- Networking & Security (Basic): Cisco Packet Tracer, Wireshark

Additional Technical Competencies

- Figma
- Microsoft Office Suite
- Adobe Photoshop, Adobe Illustrator

Professional & Soft Skills

- Strong analytical thinking and problem-solving abilities
- Effective communication of technical and non-technical insights
- Team collaboration and project coordination, with high adaptability to any work environment.

PROFESSIONAL PROJECTS

Customer Satisfaction Analysis Dashboard (Top Up Degree) – [Github](#)

- Analyzed Yelp datasets using with Python in VS Code applying data cleaning and preparing to uncover customer trends; used Git for data extraction of the datasets building a interactive dashboard in Tableau.

MediCareApp – Scalable Web App for Integrated Healthcare Management (TopUp Degree) – [Github](#)

- Built a full-stack healthcare management system to manage patients, appointments, and administrative workflows. Implemented secure role-based authentication using SQL Server and Identity Framework, following MVC architecture with a responsive frontend.

Scalable Healthcare Recommendation System – Final Project (TopUp Degree)– [Github](#)

- Developed a privacy-focused diabetes risk prediction system using federated learning for decentralized training. Applied PyTorch, SMOTE, and SHAP for modeling, imbalance handling, and explainability, with a Streamlit-based interface for predictions.
